

Product: Social Stock Analyzer

Team: Gurbinder Singh, Nout Reusken, Mihika Marathe, Ojas Upadhye, Qiuxia Tang

Sprint Completion Date: 1/25/22

Revision Number: 4

Revision Date: 2/28/22

Goal: In this sprint, we want to create the log in, create an account, and home page screens. The home page will be empty with a few UI components. Log in / log out should be functional.

Task Listing:

- As a user, I want to be able to create an account and log in and out of it so I can maintain a portfolio of the stocks of my choosing without having to create a new one each time.(5)
 - Create a login page. - Gurbinder (4 hours)
 - Create a registration page. - Qiuxia (2 hours)
 - Connect logging in and registration to the database. - Ojas (3 hours)
 - Set up a user database to store user information and configure back to front end connection. - Ojas (3 hours)
- As a user, I want a home page where I can access all the applications' features in one place. (3)
 - Set up a basic home page with buttons.- Mihika(4 hours)
- Infrastructure (3)
 - Set up Jira and Confluence. - Nout(2 hours)
 - Learn AWS and React. - Mihika(2 hours)

Team Roles:

Gurbinder Singh: Developer/Product Owner
